THE NEW MUST-HAVES FROM THE GROWING GREEN RANGE!

As the kids head back to school, your favourite ethical home furnishings brand presents its brand new eco-friendly desks and chairs. Back-to-school must-haves!

A desk with a pure, timeless design

The latest addition to the Growing Green line, Nobodinoz's collection of premium furniture made from natural materials, this desk, with its elegant, light lines, was designed in collaboration with the French designer Marc Venot, with whom we have already collaborated on the design of our evolving high chair.

Available in three soft shades (natural, deep green and blush) to suit all interiors, the Nobodinoz desk is made from solid oak and plywood, giving it an incomparable design touch.

Perfectly suited for children aged from 3 to 6, the desk can be enhanced with a chair made from high-quality wood, as Nobodinoz always places the emphasis in its creations on the quality of materials, craftsmanship and traditional craftsmanship.

The Growing Green line has been created to last. With no toxic paints or varnishes, each of the models meets the strictest European standards. With Growing Green, Nobodinoz has risen to the challenge of guaranteeing safety and sturdiness while offering products with elegant, lightweight lines.

Nobodinoz is an expert in creating timeless designs with an unmistakeable visual identity, which accompany families who are families from generation to generation.
